

# Orange Ave. Improvements

**Dwayne D'Ardenne, Transportation Division Manager**

**Luke Pugh, City Engineer**

VDOT sponsored and funded Strategically Targeted Affordable Roadway Solutions (STARS) studies provide innovative solutions to relieve congestion and improve safety throughout the Commonwealth.

The recommended improvements derived from the STARS studies are submitted through the VDOT SMART SCALE portal for potential grant funding.

Examples to follow are highlights of the Orange Ave  
(Route 460) STARS study.

Several have already received SMART SCALE grant funding  
and several have been submitted for future SMART SCALE  
grant funding.
